

THE PICS MASTFLEX TRAILER

We asked our customers what they wanted, listened to their answers, and delivered. We designed our company to create new solutions to **current** problems. We're not six months behind the curve. We're setting the pace.

The PICS MastFlex Trailer was designed by a licensed Professional Engineer, and we're so confident in every unit we produce, that his stamp of approval goes on every one before it leaves the factory.

Our continuing commitment is to ask the question, "What do you want your PiCS system to do for you?" Tell us your needs, and we'll deliver.

We offer three easy delivery options:

1. A complete, turn-key product — each unit fully customized to your specifications.
2. Construction of units to your specifications using specialized equipment supplied by you.
3. Generic PiCS MastFlex Trailers — we can help you with the installation of the customized features you need.

Protect your bottom line, your assets, and your employees.

Don't you owe it to your company, your employees, and your peace of mind to find out how PiCS can work for you? Give us a call today, and our knowledgeable staff will listen to your needs and answer your questions.

RELIABLE. FLEXIBLE. MOBILE. SECURE.

Speak to one of our representatives today to see how the PICS MastFlex Trailer can increase your security and reduce your costs.
Magnify Your Manpower.

RELIABLE. FLEXIBLE. MOBILE. SECURE.

THE PiCS MASTFLEX TRAILER

It's an uncertain world, and you're looking for ways to protect your facilities, your critical sites, and your workforce from incursion, theft, and vandalism. But you just don't have the security force to be *everywhere, all the time*.

Or maybe you need a visual record of your construction project from start to finish, complete with high-quality video. But the dynamic nature of a construction site makes it difficult to use fixed cameras.

Or perhaps you or your customers want to be able to monitor site progress from a distance and reduce time-consuming visits. What if you could view your critical site from anywhere in the world via a broadband internet connection?

Or perhaps you need powerful eyes and ears in far-flung areas to protect your assets, even across great distances and inhospitable terrain?

The PiCS MastFlex Trailer is the answer to these diverse security dilemmas.

RELIABLE The PiCS MastFlex Trailer was designed for easy deployment and easy operation.

Once in place, PiCS are practically hands-off. Communications and two-way data transmission are handled over long-distance wireless. Our standard solar-panels keep the batteries charged and make the PiCS completely autonomous. Its low-maintenance, self-sustaining design means that you can deploy and leave a system in the field for months at a time.

With a PiCS MastFlex Trailer, you can:

- **MOVE** units anywhere, anytime you need them, from densely populated urban areas to remote stretches of trackless wilderness.
- **WATCH** real-time video from any of your PiCS units from anywhere in the world over a broadband internet connection.
- **CONTROL** the high-definition, high-zoom cameras with full pan/tilt capability.
- **RECOGNIZE** a significant event in real time, such as incursions, equipment malfunctions, door access, natural disasters, and more.
- **RECORD** the event as tamper-proof "prosecutable" video at a central location.
- **SEND** a human response, if needed, to a remote event.
- **CONTROL** traffic with our customizable signage options.
- **SUPERVISE** sites from your office.
- **OFFER** customers and builders real-time viewing.
- **STOP** theft and vandalism.
- **PROTECT** a location that is constantly shifting and changing.
- **PROVIDE** for the safety of your workforce from criminals and accidents around your site.
- **ENSURE** security when the power goes out.
- **VERIFY** construction benchmarks, work force attendance, and material deliveries.
- **MAXIMIZE** security without your personnel and security budget spiraling out of control.
- **COVER** remote corners of your sites, facilities, and transmission corridors, all hours of the day or night, 365 days a year.

AUTOMATE YOUR RESPONSE SYSTEM AND DECREASE RESPONSE TIME.

You can program PiCS to perform specific actions for any given situation.

- **SEND** a wireless page, secret alarm, or make a phone call.
- **TURN** on security lights.
- **EMIT** an ear-piercing warning siren.
- **PLAY** a recorded warning message.
- **RECOGNIZE** any significant intrusion at practically any distance within line of sight.
- **RECORD** the intrusion as specially encrypted, tamper-proof video that is admissible in court, and store this video far away from the area where the intrusion occurs.
- **DETERMINE** instantly where and whether a human response is needed.
- **DISPATCH** a human response to the intrusion.

FLEXIBLE From high-value to high-security, a wide range of options fulfills your security requirements.

- **Camera systems** — Fully customizable, from high quality TV video to high definition DVD quality and beyond. Read license plates and identify individuals at tremendous distances.
- **Night vision** — See crystal-clear video in the dead of night.
- **Radio repeaters** — Expand and enhance your trunked wireless communication network.
- **Security lighting** — Illuminate the area to ward off intruders or provide light for incoming security personnel.
- **Digital signs** — Programmable and remote-control messaging, on-site.
- **Traffic signs** — Customize traffic control.
- **Emergency sirens** — Ward off criminals, warn the public, or alert personnel to the critical location.
- **Satellite and/or Cellular phone** — Onboard phone system can call in alerts from almost anywhere in the world.
- **Two-way audio** — Direct voice communication between the PiCS' immediate area and designated personnel.
- **Extended battery capacity** — Double battery capacity.
- **Camouflage paint** — Conceal your security system from unwanted eyes.
- **Battery charging options** — Solar collectors, propane, wind generator, and AC charging options available.
- **Upgradeable wireless communication** — Maximize your coverage distance.
- **Flotation tires** — Take and place a PiCS unit anywhere.
- **Electronics box cooler** — Protect the electronics in extreme heat conditions.
- **GPS locators** — Zero in on exactly where the problem is.

SECURE The PiCS MastFlex Trailer is meticulously engineered to be **tough and tamper-resistant**. It's built to withstand worst-case conditions.

Vulnerable electronics and wiring are enclosed inside the mast and rugged steel housing to prevent unauthorized access. All communications are wireless and encrypted.

Video from a PiCS unit is secure, encrypted, and recorded at your base center. Your safely stored video is tamper-proof, and it's admissible evidence in court.

MOBILE The PiCS MastFlex Trailer was designed for easy deployment in almost any terrain. All you need is a vehicle with a standard trailer hitch.

They're even convenient to transport, in quantity or by airlift, to remote areas with minimal effort, minimum set-up time, and maximum sustainability.

One person can easily deploy a PiCS within **15-30 minutes**. Its fully powered design eliminates any muscle-powered operation and requires only **minimal tools**. And you can move it to another location just as easily. Its location never becomes obsolete.

The **compact footprint** ensures they can be deployed almost **anywhere** or stored in a standard garage. The tongue folds up to minimize the footprint, and it can even be removed.

Adjustable outriggers enlarge the stability footprint in all directions, even on rough terrain. Additionally, the unit's low center of gravity increases wind resistance. PiCS units are designed to withstand 100 mph winds, so you can rest easy during storm season.

TOP-NOTCH SERVICE AND SUPPORT

At PiCS, we're so confident in our system and design that we offer a variety of warranty options.

- Six-month warranty
- One year warranty
- Extended warranty

We can also provide **trouble-shooting support via telephone hotline and internet**. We'll even send a **technician to your site, or a temporary replacement, if one of your units requires substantial repairs**.

The PiCS MastFlex Trailer is designed to be the most rugged and versatile mobile surveillance platform on the market today.

We can customize a PiCS exactly to your specifications, reduce your expenditures, and increase your security.
