

TRANSPORTATION & TRAFFIC APPLICATIONS

THE PICS MASTFLEX TRAILER

PORTABLE INTELLIGENCE COLLECTION SYSTEM

THE PiCS MASTFLEX TRAILER

Traffic congestion. Construction projects. Accidents. Natural disasters. Law enforcement. Emergency response. The need to monitor and control traffic grows more critical every day. North American traffic infrastructure is the most advanced in the world, but keeping it running smoothly is a tremendous challenge. If traffic flow grinds to a halt, so does commerce. The dynamic traffic environment makes it difficult and inefficient to place permanent surveillance, signage, or radar traffic enforcement in many areas.

Cities and municipalities are too often forced to resort to technology that is decades old when dealing with their traffic problems. And this can compound the problems that already exist, problems that need a solution.

PiCS raises the bar on RELIABILITY The PiCS MastFlex Trailer was designed to be easy to place, easy to use, and operate practically maintenance free, yet rugged enough to withstand harsh conditions and rough terrain.

- Move units wherever and whenever necessary.
- Control your PiCS units remotely. Modify messaging, control cameras, and change signage.
- Deploy nearly anywhere in 15-30 minutes, with fully powered operation. No hand-cranking, lifting, or other physical strain.
- Watch real-time video from any of your PiCS units from anywhere in the world over a broadband internet connection. Video is sent by wireless transmission to a secure location where it can be recorded as tamper-proof "prosecutable" video.
- Ensure stability in all sorts of terrain and weather conditions with the adjustable outriggers.

PiCS establishes higher benchmarks in FLEXIBILITY Can a single platform or system offer all the options you need? The answer is a resounding 'Yes.'

The PiCS MastFlex Trailer offers the widest range of traffic control, surveillance, and communications options on the market today.

- Digital signs — Fully programmable messages and scheduling.
- Traffic signs — Control traffic in dangerous areas.
- Camera systems — From high quality TV video to high definition DVD quality and beyond, customizable cameras let you read license plates and identify individuals at tremendous distances.
- Radar equipment — Gather traffic data and enforce traffic laws along roadways and intersections.
- Communications repeaters — Restore and enhance your first responder radio network in case of emergency, even during a power outage.
- Night vision — See crystal-clear video in the dead of night.
- Emergency sirens — Warn the public in emergency situations.
- Battery capacity and charging — Wide range of options makes your PiCS units completely self-sustaining.
- Electronics box cooler — Protects the electronics in extreme heat conditions.

PiCS sets new standards in SECURITY You want a system that not only provides the functionality you need in a variety of environmental conditions, but does it in the most tamper-proof and vandal-resistant package available.

The PiCS MastFlex Trailer is designed to protect all sensitive equipment.

- Tamper resistant enclosure — Locked steel enclosure keeps out all unauthorized access.
- Protected cabling — Wiring and cabling are contained within steel mast and enclosure.
- Adjustable outriggers — The unit is stable not only in rough terrain, but can safely withstand up to 100 mph winds, so in hurricane or thunderstorm season, you have one less thing to worry about.

How do you:

- Monitor vital locations?
- Customize a solution to any given location or situation?
- Control traffic flow remotely or in pre-programmed circumstances?
- Provide for alternate traffic paths in critical areas?
- Ensure emergency communications, even during natural disasters and extreme weather conditions?
- Alert emergency personnel to incidents?
- Enforce traffic regulations?
- Reduce cost and personnel requirements?

The PiCS MastFlex Trailer is your answer to all those questions.

RELIABLE. FLEXIBLE. MOBILE. SECURE.

Speak to one of our representatives today to see how the PiCS MastFlex Trailer can increase your security and reduce your costs.

Magnify Your Manpower.
